## Boastful Waldersee

Makes Speeches on Chinese Campaign That Call For Sharp Reproof.

Claims Diplomatic Triumphs and Magnifies Extent of His Work.

References That Are Supposed to Be Aimed Against Great Britain.

Berlin, Aug. 17.—Since the funeral of the Dowager Empress Frederick this has been Field Marshal Count von Waldersee's week. Immediately after the internment of the remains of the Empress a chorus of criticisms of von Waldersee broke forth in the press, owing to his speech at Hanover. Papers of the most different shades are weary of von Waldersee's talk, which is not only regarded in bad taste in the allusion to other nations, whose "names paled in China," but as magnifying the Chinese campaign far beyond its actual importance. It is a curious fact that many papers are discussing which nation von Waldersee meant as the one whose name paled. They agree that it could only have been Britain. Indeed the reference is regarded as being so direct as to be impolitic. The Anglophobe papers however, rejoice that von Waldersee expressed himself frankly. Even these papers advise him to "Speak only if not at all."

One of the most interesting inferences drawn from Waldersee's speeches is that he hopes to become Count von Bulow's successor as chancellor. This is widely believed, but anyone who saw how bent and weary von Waldersee looked in the funeral procession cannot credit the story. One of the sharpest criticisms of von Waldersee comes from the Cologne Volks Zeitung, a leading centrist organ which compares him to Dr. Von Miquel, the former minister, and refers to him as "playing the role of secret General-Kanzler (Anti-Chancellor). The paper asks whether von Bulow regards it in Germany's interest that von Waldersee should make such speeches, adding: "If things go on in this manner it will be impossible to maintain Germany's policy at all. If a zig-zag course is had enough in international politics much more must many cooks spoil the broth in diplomatic affairs. The article closes sharply as follows: "Either the will have to accept the chancellorship of von Waldersee or he must stop talking." The Hamburger Nachrichten (National Liberal), disposes of von Waldersee rather savagely. It says: "His Hanover speech by no means shows his fitness for chancellorship. It is unstatesmanlike for him to boast of diplomatic achievements in China in a form directly wounding to other nations."

with the head of one of the great industries in San Francisco the following facts were stated. One year ago the firm made the alterations in its boilers and introduced oil as fuel. A year's contract was then made for 60,000 barrels of oil. The contract price was \$1.42 a barrel, delivered at the works. Recently the contract was renewed at the reduced price of 67 cents a barrel, or a saving to the company of \$45,000. Instances of this kind revealed to him the keen competition which the handlers of coal will have to meet from the dealers in oil. The fact that the first contract was entered into as a saving compared with the use of coal, enhances the apparent danger.

The hope is held out in this city that upon the resuming of work in the mines that the condition of affairs may be such in San Francisco as to warrant the company in keeping the works open.

The mines at Extension will commence work again on Monday morning. It is not known how long they will continue to run as only temporary work is promised.

## TRAIN WRECK VICTIMS.

Remains of Daniel Le Blanc Sent East to His Home.

Winnipeg, Aug. 17.—(Special)—The remains of Daniel Le Blanc, one of the victims of the railroad accident at In-sol, were sent east to Montreal, N. B., this morning for internment. Donald McKegan will find internment in one of the cemeteries here, but so far no arrangements have been made. McKegan's body will likely be kept until it is ascertained whether an inquest will be ordered.

## BACK TO CHURCH.

Parson Finds He Prefers It to Law Practice.

Toronto, Aug. 17.—(Special)—Rev. D. C. Hossack, who was for some years pastor of Parkdale Presbyterian church and resigned to go into law, in which he had previously practised, has now returned to the church, becoming pastor of Deer Park Presbyterian church.

## VICTORIA IS THEIR CHOICE

Pacific Coast Fire Chiefs Will Meet in This City Next Year.

Tacoma, Aug. 17.—The Pacific Coast fire chiefs' convention today, after listening to several interesting papers, elected the following officers:

President, A. H. Meyers, Spokane.  
Treasurer, J. H. Carlisle, Vancouver.  
Secretary, H. W. Bringham, Seattle.  
The next convention will be held at Victoria.

## VENEZUELA'S POSITION.

Official Statement on Behalf of the President.

New York, Aug. 17.—The following cable message has been received by the Associated Press from Caracas, Venezuela, in reply to a despatch addressed to the President, asking him for a statement on the Venezuela-Columbia situation: "Caracas, at Venezuela.—In the name of His Excellency Gen. Castro, I reply to your cablegram in the following terms: The government of Venezuela, presided over by Gen. Castro, is justified in all its works and acts. It is essentially liberal in its practices. It is of the opinion that the Conservatives of Colombia, probably led by ruinous and wicked passions, have decided to assist in a revolutionary movement against Venezuela and her government. All of this has been actually proven by the official publications issued by the cabinet in Bogota. They date from the 1st of April. This view has not been denied either by the Conservative government of Colombia or by her envoy extraordinary and minister plenipotentiary in this capital. While the government of Venezuela was surprised by the first and second invasions of her frontier by 6,000 and 2,000 men, respectively, the invaders were victoriously expelled by the government and the people of Venezuela, and its national honor. These are quite apart from her active service troops on other parts of a frontier, as well as national troops scattered over the republic and the reserve military units. Venezuela has not accepted the invasion as an international attack by the people of Colombia against the people of Venezuela, but knowing its real source, recognizes in it the work of the Conservative government of Colombia against the majesty of the nation of Venezuela.

"TORRES CARDENAS, General Secretary."

## FATALITIES.

Fireman of Friday's Train Collision Is Dead.

Campbellton, N. B., Aug. 17.—(Special)—Peter Stevens, the fireman of the express train which collided at Assonet, New Brunswick, died this morning from his injuries. He was 27 years old and married only one month.

Winnipeg, Aug. 17.—(Special)—Mary Retel, the nine-year-old daughter of Carl Retel, was fatally burned in a tenement fire on Higgins street today.

Miss Sara Bennett, principal of Alexander school, is dead.

## EIGHT KILLED.

Trolley Car Ran Away and Smashed Into Railway Train.

Chicago, Aug. 17.—Eight persons were killed outright and several others seriously injured tonight in a collision between a trolley car on the Forty-Seventh street line and a Port Wayne passenger train. The motorman lost control of his car, which ran through the safety gates and crashed into the second coach of a rapidly moving train on the Port Wayne road. The motorman is said to be among the dead.

## RAILWAY TO ALBERNI.

Survey of the Route to Commence on Friday.

Nanaimo, Aug. 17.—(Special)—D. R. Harris, assisted by H. Sheppard, Nanaimo, and N. Halpenny, Alberni, have been appointed to make a survey for the Nanaimo-Alberni road with instructions to find the most direct route by way of Nanaimo lake, water to commence next Friday from the Alberni end. The expected route will tap the headwaters of the Nanaimo, Nitina, and Cameron rivers.

## Will Botha Surrender?

London Sun Says Concentration of His Forces Does Not Mean Fight.

But That Boer Commandant Has Agreed to Lay Down His Arms.

Draft of Constitution For Government of Annexed Territory Prepared.

## STRIKING TRACKMEN.

President Wilson Takes No Notice of Request to Leave Montreal.

Montreal, Aug. 17.—(Special)—Considerable interest in C. P. R. trackmen's strike circles was created today by the announcement that one of the strike committee is about to be disciplined for temporizing with the management of the C. P. R. President Wilson, of the Trackmen's union is still in the city, and has taken no notice of the request made by the conciliation committee that he leave the city within 24 hours.

Matters don't look so favorable for a settlement as they did a couple of days ago. Wilson claims the men have money enough to continue the strike indefinitely, but on the other hand it is said that some of the committee are weakening.

Winnipeg, Aug. 17.—(Special)—The C. P. R. secured an order to issue writs under the overhanging tenants act to obtain possession of all section houses occupied by the striking foremen. The sheriff will immediately take possession.

## DISAPPEARED.

Cashier of Big Packing House New York Branch Missing.

New York, Aug. 17.—J. T. Hayden, secretary of the branch in this city of Swift & Co., the Chicago packers, has been missing since Wednesday last. John Chaplin, the auditor of the company, is here from Chicago, examining Hayden's books. It is said the books are badly mixed and that he is a large defaulter.

## Harvesters Are Angry

New Arrivals in Manitoba Find Labor Market at Present Overstocked.

## Officials Claim That the Coming Week Will Find Employment For All.

From Our Own Correspondent.

Winnipeg, Aug. 17.—A demonstration occurred at the city hall and C. P. R. depot this forenoon, when crowds of angry and hungry men gathered around and demanded "bread or work." They were harvesters lately arrived from the East, many of whom had been out along the main line of the C. P. R. and retraced, having found the labor market filled to overflowing. They had come with expectations of big pay and light work, on binder or such like, and now found themselves in a strange country with neither bread, money or employment. The situation certainly was urgent and unpleasant, when the features were fully filled on the city relief officials and city clerk.

The wrath of the mob burned fiercely against the railways and local government officials for having, as they said, deceived honest men by glowing representations and big promises. After receiving all the satisfaction they could at the city hall, an adjournment was made to the C. P. R. where a similar scene took place.

In order to pacify the mob and to show them that there was no misunderstanding of the immigration officials, a message was hastily despatched to Mr. Hugh McKellar, agriculture department, who gathered up the letters received by him from government agents in the East regarding hiring of men and went post haste to the depot. He there addressed the crowd and read the letter to show that no false representations had been made. He thought there was work on the branch lines, if they would go out and look for it, and finally succeeded in getting the crowd cooled off.

It is claimed by the government that the busy season will not start until next week, and that after that every man now in the country will find employment. Harvest weather continued until today, when rain fell. It was one of the hottest days of the year.

## SCARED THE BURGLAR.

Mrs. Whyte, of Winnipeg, Has Unpleasant Midnight Experience.

Winnipeg, Aug. 17.—(Special)—Mrs. Whyte, wife of General Manager Whyte of the C. P. R., was aroused in the middle of the night by a burglar in her bedroom. The rascal turned his dark lantern on Mrs. Whyte, who naturally became very much alarmed and screamed lustily. Her screams scared the burglar, who in his hurry to get out, dropped Mrs. Whyte's jewel box, which he had in his possession. He, however, took a valuable diamond pin, which was in a pin cushion, and this was all the booty he secured.

Mr. Whyte left Yokohama today for Victoria, returning from his trip around the world.

**MILWAUKEE'S DECISION.**  
Sides With Strikers and Men Are Now Jubilant.

Pittsburg, Aug. 17.—News that the Milwaukee men had decided to cast their lot with the strikers, supplemented by the wired announcement that the steel men in the Riverside plant at Wheeling had voted to strike, awakened new enthusiasm in the ranks of the Amalgamated Association and its followers. There had been some doubt as to the final decision of the Milwaukee lodges, and it was feared that if the vote were adverse, Joliet might reconsider its last previous vote, and the chances of winning Chicago would be greatly reduced. The Milwaukee vote inspired them with the hope that Chicago would prevail upon to reconsider its vote and come over to the strikers. When the news from Milwaukee reached here tonight, it was quickly spread among the strikers. They were highly enthusiastic over it, and renewed their assurances of their complete confidence in their cause against the steel corporation. The leading steel officials had gone to their homes when the news was received, and no expression on the subject was obtainable from them. An officer of the subsidiary companies said that would merely make the steel corporation more determined to win. The information from Milwaukee and Wheeling came after a day of exceedingly quietness throughout the strike districts. The forces at the non-strike mills in operation were not increased during the day, and neither side had made an important move.

**PARLIAMENT PROLOGUE.**  
Some Doleful Comment on the Results of the Session.

London, Aug. 17.—The protraction of parliament today is the occasion of much doleful comment. Finance was the only big thing dealt with during the session. Even the Times and Standard point out the decline of authority of ministers in the House of Commons. The Statist says that the government has bungled in war and finance. It defines Sir Michael Hicks-Beach, chancellor of the exchequer as a politician absolutely ignorant of finance, and who knows as little about the money market as any other country gentleman. The paper contrasts the effect of the enormous sums borrowed in the United States by France in 1870 with the fall in consols resulting from the methods of Sir Michael Hicks-Beach and attributes it to the government's financing. It says there is a mistaken belief abroad that the resources of the country have been immensely exaggerated and that Great Britain is not so rich as implied; and claims that the belief in the almost inexhaustible resources of Great Britain has been heretofore one of the great guarantees of peace.

**EXTENSION EXPLOSION.**  
Reason Assigned for the Fatal Accident to Quinn.

Nanaimo, Aug. 17.—(Special)—The ordinary miner's lamp found in slope No. 2, Extension, is believed to account for the explosion. It was found accidentally by Thomas Morgan, inspector of mines, while trying to discover just what caused the explosion. The lamp was found in a small chamber, and the explosion was caused by the lamp. The explosion was caused by the lamp. The explosion was caused by the lamp.

**FIGHT IN PHILIPPINES.**  
U. S. Troops Have an Engagement With Insurgents.

Manila, Aug. 17.—A company of the 26th Infantry had an engagement with insurgents yesterday in Camarines province. The troops killed Zebastean Angeles, brother of Gen. Angeles, and six privates, and captured a major, two captains and nine privates. Another detachment captured the magazine of Calabang at Lumbang, and also seized a large quantity of supplies.

**NEW EDITOR.**  
Mr. Dufour Takes Charge of the M. J. Free Press.

Winnipeg, Aug. 17.—(Special)—John W. Dufour arrived from Montreal and took editorial charge of the Free Press today. Mr. Dufour, the retiring editor, is removing to Ottawa, being at present at Bonville with his family. Manitoba's cricket team left today for Chicago to play in the Northwestern tournament.

**TRANSVAAL MAILS.**  
Parcel Postage With the New Colony Has Been Resumed.

Ottawa, Aug. 17.—(Special)—The post office department received a cable today announcing that the Transvaal parcel post was resumed.

**GRANBY SMELTER.**  
Report of Amount of Ore Smelted During the Week.

Grand Forks, B. C., Aug. 17.—During the week ending today the Granby smelter treated 1,570 tons of ore. The total treated to date is 201,440 tons.

**FRISCO STRIKE.**  
Every Effort Being Made to Move Steamers Even at a Loss.

Mr. P. Elworthy, secretary of the board of trade, returned yesterday from a trip to California. He says except for the sight of a police constable on a truck, a visitor to the city would not know that anything unusual was happening. The dirty streets which prevailed for a few days while the street sweepers were on strike also indicated that there was something wrong, but men were so busy with their own work that they did not notice the places and work in that department of the city went on as usual. The Pacific Coast Steamship Company are using every endeavor to move their steamers and have re-established their schedule, having re-used but one trip. To do this, however, they are paying the city a fine of \$2 a ton on every ton of freight handled. A petition is being circulated in San Francisco, and an effort will be made to get 10,000 signatures, pointing out that the workmen are taxed to pay for police and fire protection for the city, and are being paid as an offset that the city cannot work at \$2 a day to all men who prove that they have been residents of the city for two years.

Blackwood has bitten the dust," said Kelleck. Well, he always did want the earth, commented Fosselick—Detroit Free Press.

The Finest Made—Martell's Three Star brandy.

**THE REGIMENT WON.**  
Milliamen Defeat Victoria C. C. at Beacon Hill by 84 Runs.

The Fifth Regiment Cricket team badly defeated the Victoria team at Beacon Hill yesterday afternoon, the regiment scoring 120 runs against 45 made by their opponents. For the regiment, A. McLean and C. D. H. Warden, who went in when the regiment opened their innings, and punished the bowling of Menzies and Barracough, played a very good game. The former scored 22 before he was bowled by Martin, and the latter 19 before his wicket was put down by the same bowler. The Victoria team, led by L. S. V. Pook, 15, and C. McLean, 13. For the Victoria, Barracough played the best innings, scoring 15 before he was bowled by York. The bowling honors of the match fell to Martin, who took eight wickets for 45 runs, and Menzies took one for 19, and Howe one for six. The Victoria will play Nanaimo at Nanaimo on Saturday next.

**BIG GOLD DREDGER.**  
Powerful Mining Machine on North Thompson Completed.

From Kamloops Standard.  
Yesterday afternoon was the day fixed for the starting of the machinery on the big gold dredger at Jamieson creek on the North Thompson river. In response to an invitation from F. J. L. Tyler and Mr. Satchell Clarke quite a number of townspeople journeyed up to the dredger, which is at present moored where she was built, on the east side of the river, opposite Jamieson creek, and about half a mile from Gruenier's Gold Dredge hotel. Those who saw the dredger for the first time were astonished at the size of the scow and the immense weight and power of the machinery. The crane on which the buckets are being swung over forty tons. Each of the buckets weighs over 1,000 lbs. They are composed of wrought iron with manganese steel lips, so hard that a file could not make an impression on the metal. The machinery is of the true New Zealand type, slightly modified to suit the conditions in this province. It will cost \$50,000 net and was designed by F. Satchell Clarke, mining engineer of Vancouver, and formerly of New Zealand, who is now supervising the work of construction. The dredge was manufactured by the Wm. Hamilton Co. of Vancouver and Peterborough. The capacity of the machine will be 2,000 yards every 24 hours, and will be operated night and day, with three eight-hour shifts.

Gravel going ten cents per cubic yard in gold it is claimed, will pay to work, and as the company's property gives surface indications from five cents to \$1.50 per yard, it is said that if their expectations are realized the dredger will be a gigantic success. The dredge is of the bucket-ladder style, and will reach to a depth of 45 feet under the surface of the water. The buckets bring up the gold-bearing gravel and deposit it in a receiving screen 24 feet long and five feet in diameter. The coarse material passes down the screen and is carried off by the tailings elevator to a point far in the stern. The finer material containing the precious metals of gold and platinum, passes through the screen and is caught on New Zealand riddles, which have first a covering of linen cloth then coconut matting, steel wire screens being placed over these. Mr. Clarke claims that these tables will save the very fine gold as well as the coarsest variety.

At a given signal, Miss McManush pulled the lever, starting the buckets to revolve. The spectators were enabled to judge as to the manner of the working of the dredge, but it was not quite the order for a successful start yesterday. Quite a number of little drawbacks always occur in starting such wonderful workings as are on this dredger. These, it is expected, will be overcome in the work to when the dredger will be taken down to the spot where it is intended to start to work.

**SERVANT GIRLS' UNION.**  
In Chicago the domestic help has formed a union and formed a set of rules. Here are some of the rules:

"Work shall not begin earlier than 5:30 a. m., and shall cease when the evening dishes are put away.  
"Two hours each afternoon and an entire evening at least twice a week shall be allowed the domestic as her own.  
"There shall be no opposition on the part of the mistress to club life on the part of the domestic.  
"Gentlemen friends shall not be barred from the kitchen or back porch.  
"Members of the family shall not interfere the conversation arising during sick visits.  
"On Monday such hours shall be allowed as will permit domestics to visit friends, counters and enjoy the same as the mistress and her daughters."

Buy your new school readers at Ormond's Book Store, 92 Government street. We give away adjustable book covers, scratch pads, blotters and rulers.

Garden Fete.—There will be a garden fete given under the auspices of the Women's Auxiliary, and the Daughters of Pity, at the Royal Jubilee hospital on Thursday, August 23, from 3 to 10 p. m. The fete is under the distinguished patronage of the Lieutenant-Governor and Lady J. de Lottinville; Rear-Admiral A. K. Bickford and Mrs. Bickford; Colonel Grant, R. E., and Mrs. Grant; His Worship the Mayor, and the president and board of directors of the P. R. J. hospital. The band of the Fifth Regiment has again kindly promised its services, and the Cecilia orchestra will assist on the lawn decorated to refreshments. The net proceeds from the fete are to be devoted towards purchasing a sterilizing apparatus for the hospital, and it is hoped that the public will cordially support an effort made with so worthy an object.

Seamen's Institute.—The manager of the Seamen's Institute acknowledges with thanks the receipt of reading matter during the month of July from the following: Mrs. H. D. Heineken, Mrs. Geo. Gillespie, Mrs. P. S. Barnard, Mrs. Glennie (Esquimaux), Mrs. R. Maynard, Mrs. McMeekin, Mrs. James C. Smith, Mrs. P. Archibald, The Lord Bishop of Columbia, Mr. Mortimer Lamb, Mr. F. C. Malpas, Mr. H. Barnett, Mr. S. Greenwood, Mr. A. H. Ridgeman. The Colonist and Times daily papers, and one anonymous donor; Mrs. Barnard, Mrs. Pemberton and the Misses Goward and Pitt. The following contributions to the Seamen's Institute and Mission Fund, during the month of July are also gratefully acknowledged: His Honor the Lieutenant-Governor, \$10; a sailor, 15 cents. The Institute is still patiently waiting for some old friend to present it with a flag, the need of which is very much felt on "High days and holidays" when as a loyal subject of the British Empire one likes to show their patriotism.

May Not Take Part.—It is probable that the Fifth Regiment will not be required to take part in the manoeuvres in connection with the mobilization at the forts on Labor Day. The Sixth Regiment at Vancouver are to go into camp for two weeks at Vancouver before coming down to take part in the mobilization. The Trades and Labor council are endeavoring to have the date fixed for the mobilization changed, as it conflicts with their celebration arranged for Labor Day.

New Agency.—Mr. E. C. B. Barshaw, agent of the Ottawa Fire Insurance Co., has been fortunate enough to secure the district agency of The London Mutual Fire Insurance Co., a company that has been established for over 40 years, and does nearly the entire business of any company in Canada. It has over 48,000 policies in force and has paid over \$2,000,000 in losses.

Three Star Martell can be obtained from all dealers.

Getting Machinery Here.—J. R. McGovern, a recent arrival from the Klondike, says that the machinists strike is causing a shortage of machinery in the northern mining district. He came out to secure machinery, and will send north shortly two one hundred horse power boilers. He is having two boilers constructed at the Albion Iron Works of fifty horse power each, for the Haysen, Schultz & Wells, operators on Gold Run creek. The sudden advent of hot weather last spring which quickly thawed the snow, caused a shortage of water in the Klondike which retarded operations somewhat this season.

Blacksmiths Take a Holiday.—The carriage makers and horse shoers of the city took a day off yesterday, and with their families and friends proceeded to Cadboro Bay to enjoy themselves. It was their first annual picnic and that it was enthusiastically taken up is shown by the fact that all the shops were closed during the day, and that about two hundred persons repaired in carriages and other conveyances to the picnic ground, which has been chosen on the point at the far end of Cadboro Bay. A good programme of sports had been provided for old and young, ladies and men, and all joined in to have a good time. There was too a baseball match between the wood workers and blacksmiths, which was won by the blacksmiths, probably on account of their heavy hitting. In the other sports cash and merchandise prizes were given. The first prize being \$1, and the second 50 cents, except where otherwise mentioned in the following list of events and winners.

Boys' Under 8 years.—1st, B. Shields; 2nd, A. Wells.

Girls' Under 8 years.—First, G. Martin; 2nd, J. Christenson.

Pat man's race, over 200.—First, Gus Borden; 2nd, R. Anderson. The winner of this race got a gust of beef from W. McKeene, and the second a whip from Wade & McKoon.

Girls' Under 15 years.—First, H. McKinnon; 2nd, R. Christenson.

Boys' Under 15 years.—First, A. McGee; 2nd, G. Martin.

Young man's race, under 25.—First, E. White; 2nd, M. Graves.

Teamsters' Race.—First, Mr. McGinnis; 2nd, G. McKay. Winner of this received a horse harness from Wade & McKoon.

Boys' Under 15 years.—First, A. McGee; 2nd, G. Martin.

Woodchoppers' Race.—First, A. Strubs; 2nd, R. Anderson.

Blacksmiths' Race.—First, T. Genes; 2nd, E. White.

Three-legged Race.—First, A. McGee; 2nd, G. Martin.

Painter's Race.—First, E. Brooks; 2nd, Shobolt.

Young Ladies' Race.—First, Miss Christenson; 2nd, Miss Bryant.

Boys' Under 15.—First, J. A. McGee; 2nd, T. McGee.

Married Ladies' Ball Throwing Contest.—First, Mrs. R. Bray, 122 feet; 2nd, Mrs. Russell, 85 feet.

Old Men's Race.—First, Mr. Finerty; 2nd, Jack Clark.

The quiet match was won by Mr. Woods, for which he got a bottle of Scotch whiskey from the Regent saloon.

Don't drink Jesse Moore whiskey unless you want the best.

Getting Machinery Here.—J. R. McGovern, a recent arrival from the Klondike, says that the machinists strike is causing a shortage of machinery in the northern mining district. He came out to secure machinery, and will send north shortly two one hundred horse power boilers. He is having two boilers constructed at the Albion Iron Works of fifty horse power each, for the Haysen, Schultz & Wells, operators on Gold Run creek. The sudden advent of hot weather last spring which quickly thawed the snow, caused a shortage of water in the Klondike which retarded operations somewhat this season.

Three Star Martell can be obtained from all dealers.

## Constitution

## Wins the Race

The Eighth Time She Has Beaten Columbia in Fourteen Races.

Fair Test of Both Boats Shows That Difference is Not Great.

Larchmont, N. Y., Aug. 17.—Today's race between Constitution and Columbia was only a matter of seconds. For the fourteenth time the two yachts finished a contest and for the eighth time Constitution came out a winner. Today the margin was so close that Columbia only by 58 seconds, corrected time. In elapsed time she won by two minutes and 12 seconds.

The race was sailed under conditions best suited to Constitution, being an S. knot breeze, and a smooth sea. It was finished in three hours and three minutes, which was fast time considering the wind, and the fact that 12 miles of the course called for windward work, although it was not a dead beat. Constitution gained on her rival on every leg, doing best in reaching. Today's contest was a fair test of speed as the boats got the wind throughout and there was little to choose in the handling. It represents about what the new Constitution can do against the old Columbia under the conditions which prevailed, and while many yachtsmen who have followed the boats are disappointed that the difference between them was not greater, quite as many more are satisfied that Constitution has proved sufficiently superior to warrant her selection as the cup defender. The course chosen today was a beam race of six miles a leg of six miles with a long and a short leg, and a broad reach of three miles, twice around to the start, was one of the closest ever made by the two yachts as they got off only two seconds apart. The reach down to the first mark was made in quick time and it was only a fast beam reach that kept up the pace. Constitution covered the six miles in 43 seconds less than Columbia. After rounding, Constitution made a shore tack in shore and came about on the weather bow of Columbia, just as the old boat luffed. She was starting overboard and stood down on a long starboard tack toward the entrance of Hempstead Bay. Columbia was seen to be doing better close hauled and when half way down to the next mark went down on a beam reach and started off with a good hard pull. Constitution, however, pointed well up and kept her windward position. Coming out into the bay the new boat caught the fresh wind first and added materially to her lead. Both boats went on to make the second mark with one long and one short leg. Constitution rounded the second mark one minute nine seconds ahead of Columbia. The wind was now about the best of the day, and was blowing well up to 10 knots. Both boats came over to the home mark off Larchmont on a broad reach with big jib-top sails and balloon staysails. On this short leg of three miles Constitution added only a second to her lead. After rounding the mark and starting overboard the course the second time, Constitution's men had trouble in sheeting home the big reaching sail, and the sail was shaking in the wind for over a minute. The wind still held, and the two boats, but the first mark, a six mile leg, in less than half an hour. They started timed as follows at the mark: Constitution, 3:05:25; Columbia, 3:07:25. Constitution had added 40 seconds more to her lead.

Both went about on the port tack immediately after rounding and stood down to the Long Island mark, a long leg. Constitution having a good lead, and Columbia under the headlands and into the open bay, and was first to get the increasing breeze. They tacked around the mark and stood for the finish line as follows: Constitution, 3:50:00; Columbia, 3:52:10.

On this leg of Constitution had gained 20 seconds more. Both broke out balloon jibs and spinnakers for the run in, wind having shifted a bit into the south at the same time, came in light. The finish was as follows: Constitution, 4:08:23; Columbia, 4:10:13.

LAWYERS' GAME.

Victoria Counselors Getting in Shape for Contest with Vancouver.

All arrangements are well under way for the baseball game next Saturday afternoon at this Bay park between the Victoria and Vancouver lawyers. Various measures are being taken to prevent any counter attraction from interfering with the game, writs having been prepared and duly stamped for service on A. H. Hall, in the event of his attempting to come on a ball game at the Bay park. Peas are also being prepared for service during the week, requiring everyone to put in an appearance at the game, as the proceeds are to be handed to the Women's Auxiliary of the Jubilee hospital.

It is likely that His Honor the Lieutenant-Governor will pitch the first ball, as he has signified his intention of being present, if possible. The local bar nine has been practising steadily at the Caledonia grounds during the past week, and it should be in shape to play the Vancouver team on Saturday afternoon.

## Lacrosse Men

## ON ROUGH PLAY

Opinions of Presidents of Eastern Clubs on Best Method of Prevention.

From Montreal Herald.

There is not a lacrosse match played in which one team or perhaps both the teams are not charged with undue roughness. This is often the last resource of a defeated team, but there is too often considerable truth in the charges. The grand stand often confuses hard checking and foul checking, and so charges are often made against certain players which have little foundation. But there is enough at the bottom of all these cases of rough play to warrant the opinion that the game as played today is unduly rough.

To ascertain the opinion of the league on the matter, the president of the N. A. L. U. and the presidents of the clubs composing it were asked to state their views, and these are given below:

President Pittaway, of the N. A. L. U., and one of the Capital executives, thinks that roughness in lacrosse depends entirely on the referee. He says that the rules against roughness are numerous enough and strict enough and that when roughness occurs, his experience is that it is due to leniency on the part of the referee. Roughness usually starts at the beginning of a game, and if the referee promptly sets on it the rest of the game will be clean. Mr. Pittaway has not considered any further remedies than now exist.

Mr. Wm. Branley, president of the Montreal Lacrosse Club, expressed his opinions as follows:

"That there has been too much rough play this season no one can doubt or deny. The game is being played on a level, and the ordinary young fellow, say in an office, can't play for the reason that he must take the risk of being laid up for days after any match. Play today means that the defence men stay where they are and a home man coming in is stopped by a deliberate blow. No man wants to be injured in this way and a continuation of these tactics simply means that the better class of fellows in the game at present will drop out and the better class of spectators will cease to attend the matches.

"How to put a stop to this is a question which is very difficult to answer. I think myself that the penalty for deliberate fouls should be very much more severe. At present it is possible to kill a man and only be out of the game for ten minutes. In my opinion deliberate fouls should be penalized by retirement for the match at the discretion of the referee. Other fouls, too, should be more severely dealt with than under the rules at present.

"There is another point which should be attended to. Many, I was going to say most, of the referees, do not know the game, but they are old men at the game, but they are busy men and have not followed the changes from year to year. Some of the board of referees, I understand, have not even a copy of the rules. Under these circumstances, it is no wonder mistakes are made. That is a matter which is hard to control, but the league can do this much towards reducing the roughness—they can increase the penalties for rough play."

Mr. Thomas O'Connell, president of the Shamrock Lacrosse Club, expressed the following opinion:

"There is no more roughness now than there was a few years ago. I don't think it is on the increase, as some people say, but there certainly is too much of it, and I think the whole blame lies with the referees. The rules are strong enough, and the penalties are great enough; if the referees would only enforce them. That is where the difficulty lies. If the referee would go out on the field prepared to enforce the rules, and put the first man off that deserved it, the players would find out that it didn't pay to commit fouls and would stop it. We must certainly exercise greater care in the choice of referees. There are some men on the board this year who are not what they should be, and the clubs should watch this closely, and see that they are not nominated next year again."

Mr. A. Meunier, president of the National Lacrosse Club, says:

"In my opinion there is altogether too much roughness allowed and it is spoiling the game. It means that a different class of men will be playing the game if it keeps on the way it is going at matches will fall off greatly. The fault, I think, lies in the rules, which are not severe enough for deliberate fouls. At present a man goes off for about ten minutes for laying a man out deliberately. That is not enough. If he hurts his man badly he can go off for ten minutes and his side has still the advantage that should not be. For a deliberate foul by which a man is hurt the offender should go off for the entire match. Unless the rules in this respect are made severe I see very little chance of the game being made cleaner. When there is another thing which influences the game, that is the referees.

There is great difficulty in getting a referee who knows the rules and who is strict enough to enforce all the penalties. This is another cause for roughness. The chief cause, however, for it is the rules themselves, which are not severe enough."

Ald. James Davidson, president of the Capital Lacrosse Club, Ottawa, takes this ground:

"I think that today we are verging on a rougher system of play than is necessary in the best interests of our national game. Understand me, I am not one of those individuals who fancy that lacrosse can be successfully played with the same etiquette as you usually find on a cricket field or a lawn tennis court. I plead guilty to feeling a certain amount of enjoyment in seeing a husky and sportsy player earnestly engaged in putting some physical energy into an up-to-date body check, and I believe such to be allowable and one of the fine points of the game. But I have no sympathy with any player who deliberately and systematically makes a point of fouling and slashing with the stick, and such play ought to be done away with."

"I further believe that the referee that for such action on the part of the players. Lacrosse is a grand game. It is on the boom. Let us see to it that we make it what a great Canadian, the late lamented Dr. Beers, intended it to be, the greatest game in the British dominions."

A. F. Rutter, president Toronto Lacrosse Club, on how to stop lacrosse roughness, said:

"I believe the only way to stop roughness in lacrosse is by a capable and fearless referee. The game from start to finish is in the hands of the referee. If you were to make fifty rules touching

## HE SMASHED

## THE RECORDS

Hancock Establishes New Times for the Oak Bay Bicycle Track.

At the Oak Bay track yesterday afternoon Joseph Hancock, the young Victoria bicycle rider, lowered the track record for a mile, both professional and amateur, and also cut the Canadian record for a third of a mile. An effort will be made by him to still further lower the records and make them official. Yesterday's trial was made before the start of the baseball match, and on a track that must have been at least a couple of seconds slower, as very little work has been taken of it recently. Hancock rode an Ivo-Johnson wheel, and was paced by Messrs. Thompson, Jackson, Bartlett and Beaumont, on Clayton & Costin's quad. His time was 2:30 2-5, which is three-fifths of a second better than the time made by Cotter, a professional on the track some years ago. The best previous amateur record was held by Spain, who made the mile in 2:40. Hancock made the first third in 38 seconds, which is three seconds faster than the Canadian record for that distance. With a good track and faster pacing, Hancock would certainly make the mile in very much better time.

TENNIS AT COWICHAN.

Some Grand Play in District Tourney on Friday.

The annual tournament of the Cowichan Lawn Tennis Club commenced on Friday afternoon shortly after 2 p. m.

The Victoria West junior lacrosse team had their colors lowered yesterday afternoon by the James Bay juniors, the match played before a good-sized audience at the Caledonia grounds resulting in a victory for the Bays by a score of seven goals to nothing. Although the score seems indicative of a one-sided game, this was far from the case, for the two twelve players played well, and the match was one of the best exhibitions of junior lacrosse seen here. Both teams seemed to have some very promising stick-handlers, and if the juniors are not encouraged as they should be, Victoria will in a few years have much material to choose from in making up the composition of the senior team. The team work of the Bays was a feature of yesterday's game, for although the Victoria West players showed up well, their combination play was not as good as that of the James Bays.

For the Bays, Loveridge at point, Laing at cover-point, both played a star game, and Hinton, at center, supported by Houghton, Pike, and F. Cullen played good lacrosse. These were the most noticeable of the team of twelve stick-handlers, all of whom played a game that was worthy of praise. For the Victoria West, Stevens at point was the star. Again and again he saved the flags of his team, and Cossford, supported by Stevens, Duncan and Kirk, kept the defence of the Bays busy. Mr. Geo. Caldwell acted as field captain for the Victoria West twelve, and Ed. Milne was captain of the Bays. Mr. Haley Wilson was a most efficient referee.

The score was as follows:

Game. Won by. Time.

1. James Bays vs. Fred Cullen, 21 min.

2. James Bays vs. Pike, 12 min.

3. James Bays vs. Edmonds, 2 min.

4. James Bays vs. Pike, 12 min.

5. James Bays vs. F. Cullen, 12 min.

6. James Bays vs. Hinton, 12 min.

7. James Bays vs. Houghton, 12 min.

8. James Bays vs. Cullen, 12 min.

9. James Bays vs. Hinton, 12 min.

10. James Bays vs. Houghton, 12 min.

11. James Bays vs. Cullen, 12 min.

## A BIG CATCH.

## A BIG CATCH.

The accompanying cut shows Mr. John Longmaid of Helena, Montana, and a catch of 29 trout, weighing 61 pounds, which he made at Cowichan Lake last month. During his stay at the lake Mr. Longmaid caught 328 trout. The picture was taken beside the Lakeside Hotel at the lake.

There is no more roughness now than there was a few years ago. I don't think it is on the increase, as some people say, but there certainly is too much of it, and I think the whole blame lies with the referees. The rules are strong enough, and the penalties are great enough; if the referees would only enforce them. That is where the difficulty lies. If the referee would go out on the field prepared to enforce the rules, and put the first man off that deserved it, the players would find out that it didn't pay to commit fouls and would stop it. We must certainly exercise greater care in the choice of referees. There are some men on the board this year who are not what they should be, and the clubs should watch this closely, and see that they are not nominated next year again."

With a good track and faster pacing, Hancock would certainly make the mile in very much better time.

TENNIS AT COWICHAN.

Some Grand Play in District Tourney on Friday.

The annual tournament of the Cowichan Lawn Tennis Club commenced on Friday afternoon shortly after 2 p. m.

The Victoria West junior lacrosse team had their colors lowered yesterday afternoon by the James Bay juniors, the match played before a good-sized audience at the Caledonia grounds resulting in a victory for the Bays by a score of seven goals to nothing. Although the score seems indicative of a one-sided game, this was far from the case, for the two twelve players played well, and the match was one of the best exhibitions of junior lacrosse seen here. Both teams seemed to have some very promising stick-handlers, and if the juniors are not encouraged as they should be, Victoria will in a few years have much material to choose from in making up the composition of the senior team. The team work of the Bays was a feature of yesterday's game, for although the Victoria West players showed up well, their combination play was not as good as that of the James Bays.

For the Bays, Loveridge at point, Laing at cover-point, both played a star game, and Hinton, at center, supported by Houghton, Pike, and F. Cullen played good lacrosse. These were the most noticeable of the team of twelve stick-handlers, all of whom played a game that was worthy of praise. For the Victoria West, Stevens at point was the star. Again and again he saved the flags of his team, and Cossford, supported by Stevens, Duncan and Kirk, kept the defence of the Bays busy. Mr. Geo. Caldwell acted as field captain for the Victoria West twelve, and Ed. Milne was captain of the Bays. Mr. Haley Wilson was a most efficient referee.

The score was as follows:

Game. Won by. Time.

1. James Bays vs. Fred Cullen, 21 min.

2. James Bays vs. Pike, 12 min.

3. James Bays vs. Edmonds, 2 min.

4. James Bays vs. Pike, 12 min.

5. James Bays vs. F. Cullen, 12 min.

6. James Bays vs. Hinton, 12 min.

7. James Bays vs. Houghton, 12 min.

8. James Bays vs. Cullen, 12 min.

9. James Bays vs. Hinton, 12 min.

10. James Bays vs. Houghton, 12 min.

11. James Bays vs. Cullen, 12 min.

## Powell Is

## The Champion

Victoria Lawn Tennis Player Wins Quite Handily From the Californian.

Four of the First Prizes Captured by Victorians at Tacoma.

Tacoma, Wash., Aug. 17.—(Special.)—R. B. Powell of Victoria today won the tennis championship of the Pacific Northwest by defeating Hardy. Thus Victorians won four of the first offered at the second tournament, and one at the second. Powell upset all calculations, wading through Sam Hardy, the much vaunted Californian in three straight sets. Powell developed remarkable accuracy and speed in all of his back court strokes, and his playing from the net was fast and sure. He rarely made the hardest kind of an effort to win out, and had no excuses to make for his defeat, saying that he was bested by a cleverer man. Powell's victory was received with much enthusiasm, and there is a movement on foot to induce him to enter for the Pacific Coast championship in San Francisco next month, when there is little doubt that he would prove an easy winner. Mrs. Burton and Miss Goward won the ladies' doubles, and the latter had little difficulty in putting the singles to her credit.

On Friday some magnificent tennis was witnessed. Goward had an excellent match with Sam P. Hardy of California. The first set was hard fought all the way through and brought a hard read four games all, Hardy by brilliant work got the odd two games. In the second set the Victorian went ahead with a rush, and gave as good an exhibition of tennis as has been seen on the local courts, and with four games to his opponent's one the effects of the hard work in previous matches began to tell, and the California crack played up and took the next 5 games. Score of match 6-4, 6-4.

R. B. Powell of Victoria had the hardest kind of work to defeat R. G. Breeze, the local champion. Breeze commenced by playing a very confident game, and in the first set by his clever net play and his double faulting outplayed the British Columbia man, capturing the set at 6-3. Powell settled down to his true form in the next set, and with very steady net work and accurate placing beat his opponent by 6-1. The final was full of interest, Breeze has never been full of better advantage, and he was seen to be better than his opponent's one the effects of the hard work in previous matches began to tell, and the California crack played up and took the next

### THE WEATHER.

Meteorological Office,  
Victoria, B. C., Aug. 18, 1901.

**SYNOPSIS.**  
Fair weather has prevailed throughout the day, although the barometric pressure continues low. The depression that has hovered over Alberta for some days has been cleared away, and is central in Manitoba. A thunderstorm occurred at Winnipeg, but in general, the weather continues clear through the Northwest. In the North Pacific States the weather has been chiefly cloudy and temperatures have been somewhat lower. Rush fire smoke is reported from many sections.

**TEMPERATURE.**

	Min.	Max.
Victoria	50	60
New Westminster	48	58
Kamloops	50	78
Barriere	50	60
Calgary	41	64
Winnipeg	42	64
Portland, Ore.	54	80
San Francisco	50	60

**FORECASTS.**  
For 24 hours from 5 a. m. (Pacific time), Sunday:

Victoria and vicinity: Moderate or fresh southerly winds, partly cloudy, stationary or lower temperature.  
Lower Mainland: Light or moderate winds, mostly fair, not much change in temperature.

**VICTORIA DAILY RECORD.**  
Report for 24 hours ending 5 p. m. Observations taken daily at 5 a. m., noon and 5 p. m.

**SATURDAY, AUG. 17.**

	Mean	High	Low
5 a. m.	51	59	47
1 p. m.	54	62	50
5 p. m.	57	64	52

The velocity and direction of the wind were as follows:

5 a. m. .... Calm.  
Noon ..... 4 miles southwest.  
5 p. m. .... 4 miles southwest.

Average state of weather—Clear.  
Sunshine—11 hours 24 minutes.  
Barometer at noon—Observed.....30.022  
Barometer at noon—Corrected.....30.015

**NEW WESTMINSTER.**  
Barometer at 5 p. m.—Corrected.....29.92

The gem excursion of the season will be seen on Sunday next, August 18, by the Victoria and Sidney Railway and Steamer Inland, to Friday Harbor, San Juan Island. Train will leave Hillside Avenue station at 9 a. m., returning the same day. Fare for round trip \$1.00.

### VICTORIA TIDES.

For the Month of August, 1901.  
(Issued by the Marine Survey Branch of the Department of the Marine and Fisheries, Ottawa.)

The zero of the accompanying scale corresponds to the high water of 1900, and 183 feet above the sill of the Esquimalt Dry Dock.

The time used is Pacific Standard for the 120 meridian west. It is counted from 0 to 24 hours, from midnight to midnight. The height is in feet and tenths of a foot.

### IT STRIKES THE HEART.

Not only is the victim of Rheumatism a constant sufferer, but he lives in continual dread that the disease will reach the heart, which means sudden and unexpected death. Rheumatism can only be cured when the uric acid is removed from the blood by the healthy action of the kidneys. Dr. Chase's Kidney-Liver Pills make the kidneys healthy and vigorous, and so gradually and thoroughly cure rheumatism by removing the cause. One pill a dose, 25 cents a box.

### W. F. LUXTON.

Well Known Canadian Writer Returning to Manitoba.

From Winnipeg Tribune.  
It is currently stated in government circles that Mr. W. F. Luxton, who has resigned the management of the St. Paul Globe, will be given an important position under the local government. It is known that an offer has been made Mr. Luxton, but it is not known whether or not he will accept the situation. The nature of the appointment is not known, but it is said to be in the land department. In a private letter to a friend Mr. Luxton states that he is coming back to his old days in the province, for which he has always had a warm heart, and among the people who are loyal subjects of the British Empire. The Union Jack has not lost any of its attractions for the veteran journalist.

### FIFTY AGAINST TWO.

It is not reasonable to expect two weeks of outting to overcome the effects of fifty weeks of confinement.  
"Take a bottle of Hood's Sarsaparilla along with you. Three doses, daily, of this great tonic will do more than anything else to refresh your blood, overcome your tired feeling, improve your appetite, and make your sleep easy and restful."

### A CITY OF DOVES.

An enthusiast remarks that, year by year, London becomes more and more a city of doves. He could name every building where it is possible to find a dove, and sees constantly increasing flocks of the pretty creatures. In the sunlit spaces where they alight and feed, the soft rustle of their wings and the peaceful sound of their cooing make the noise of the streets, "and their fearless tameness seems like a token of the quiet security in which we live." It is urged that London eventually will become the happy refuge of birds and bees, that the less and less favor in cruel country places. The prospect has food for the imagination.

### DON'T THROW THEM AWAY

It is just like throwing away money when you throw away the SNOW SHOE TAGS which are an ever good of HOBBS' PATENT AND CURRENCY CROWNING TOBACCO. Save them and you can have your choice of 150 handsome presents. Ask your dealer for a catalogue.

**RALSTON CULTURE.**

Some Important Facts Connected With Its Efficiency.

Ralston Physical Culture is not only the greatest system of hygiene and training ever produced by the hand of science, but it is so powerful in its effects upon the health that the leading physicians of America, throughout the length and breadth of the land, are prescribing it in place of medicine. Some of the important facts connected with its efficiency are here stated in brief form:

1. Its results will not merely interest the pupil; they will cause wonderment that so much good can be done so quickly.  
2. The progress will be steady, clear, distinct, strong and lasting.  
3. The secret of what seems to be the most puzzling and mysterious improvement is found in the amazing power of vitality which is derived from the continual shifting of action from one set of muscles to others in turn, producing instead of weariness, a constant exhilaration and increase of strength.  
4. The body works, not like one machine, but like many, distinctly separated in their uses.

5. This is the only regime by which perfect appetite is established, perfect assimilation of food attained, and perfect nutrition secured for building up a new body.

6. The exhilaration produced by the Ralston Culture attracts the pure elements of the blood, destroys bad tissue, creates good flesh.

7. Over-development is due to fat, not flesh; and Ralston Culture destroys this fat.

8. Shrunken flesh or thinness is due to lack of nutrition, not in diet, but in the tissue-growth of the body. See No. 5 above.

9. Ralston Culture differs from work in that it enforces the body to a vigorous excitement, and builds up a vigorous vitality; while work, without relaxation, deforms the shape, crooks the fingers, depresses the chest, and bends the spine.

10. Ralston Culture adopts the play-movement, and yet differs from play in that it benefits all the functions and parts of the body without strain or loss; while play develops certain parts to excess.

11. New flesh and increased vitality will throw off maladies that medicines are unable to overcome.

12. Of all the methods employed, that known as the Ralston system of Physical Culture is the first and the only perfect and complete hygienic training in existence. It gives special satisfaction. Schools and colleges are adopting it. Men and women are seeking it. It is becoming more and more popular every season, and during the last year it has advanced materially in public favor. The exercises are arranged with great care founded upon a long series of experiments and tests and ingeniously suited to the laws of health.—Com.

**MARINE MILITIA.**

A Suggestion That Canada Should Take Practical Steps to Aid Navy.

From Canadian Military Gazette.

Well-founded rumor indicates a change in the department of fisheries. Its head, Sir Louis Davies, is about to accept a seat on the Supreme court bench. A branch of the department is the "Fisheries Protection Service." For some time past there has been a "branch" in the cabinet to have that branch transferred to the militia department. That desire seems both natural and proper, for the "Fisheries Protection" is an armed service, easily convertible into that of "Active Militia—Marine Force," which is contemplated for the militia. Hitherto the Dominion has done nothing in the way of naval defence. Here is a favorable opportunity to make the announcement—to lay the foundation of a naval organization, which soon must be taken in hand with very little extra outlay both the material and the personnel of the "Protection Service" could be used in training the nucleus of a naval militia. Later, with the increase of armaments, the nucleus could be added, and gradually the fleet could be built up, and the navy would expand into something respectable—sufficiently respectable to take away the reproach that the British supremacy on the ocean is to be protected only by a few distant waters. The military of Canada should specially be pleased to see this step, for it would increase the prestige of the militia, would enhance the weight and influence of the militia department, and would create a new class of our citizen soldiers who are dwellers by the sea.

**BRANDON.**

Resounding Important Place as a Railway Centre.

From Winnipeg Free Press.

The Canadian Pacific Railway Company it is understood, contemplate making very extensive improvements in their property here, indicating that Brandon is becoming a railway centre of considerable importance. During the present summer there have been twenty or more regular trains in and out of Brandon daily, including fourteen passenger trains, and the announcement that an officer would be placed here to act as superintendent of the branches running out of Brandon, shows the amount of work being done here. The placing of a regular dispatching staff at this point will increase the importance of the point. It is also the intention of the company to extend their yard here, giving more facilities for handling a large amount of business. The company will also increase their freight sheds here.

**JEALOUS RIVALS**

Cannot turn back the tide. The demand for Dr. Agnew's little Pills is a marvel.

It's the old story, "The Survival of the Fittest," and "Jealousy its own Destroyer."

Cheap to buy, but diamonds in quality—banish nausea, coated tongue, water brash, pain after eating, sick headache; never gripes, operate pleasantly. 40 doses, 10c.; 100 doses, 25c. Sold by Dean & Hiscock, and Hall & Co.

**W. T. HARDAKER.**

**BRAVE CANADIAN CAPTAIN.**

Rescued Crew of Steamer Preston at Imminent Risk of His Own Boat.

From Mail and Empire.

There is a movement on foot to have the Congress of the United States award Capt. George Macdonnell a medal in recognition of the skill and bravery in rescuing the crew of the waterlogged steamer Preston in Lake Superior a month ago.

Capt. George Macdonnell is the commander of the C. P. R. Company's palatial steamer Athabasca. He is a Canadian, and one of the most popular captains on the Great Lakes.

It is not given to whom honor is due there is none more deserving than Capt. Macdonnell. Heedless of his own life and regardless of what the probable consequences to himself, his crew, and the property under his charge, might be, he ran alongside of the steamer Preston, and after a struggle lasting ten hours, during which the waves ran mountains high, succeeded in saving the lives of eleven persons who were aboard, at the very imminent risk of losing his own boat and the lives of all on board. Four times during the struggle the two steamers came together, and the damage to the Preston in the various encounters is now plainly visible as she lies awaiting docking at Duluth. Only one man was lost in the transfer, the life of a sailor being crushed out as the two boats came together in a heavy sea.

The rescue was one of the most daring in the history of the lakes, the chances taken were most desperate, and the result showed that Capt. Macdonnell was possessed of the courage and determination, the skill and pluck which make men rise when occasion presents itself, and perform acts which were unaccompanied to the dangers surrounding a wreck at sea cannot comprehend.

A guileless city man wandered through the country with his rod over his shoulder, seeking out a promising place to toss a fly. He soon came to a pond, near the edge of which was a sign that said: "No fishing." The city man scratched his head as he gazed at these words, but finally sat down on the shore, and was surprised at the number of bites he got. Pretty soon the game warden came along and cried out:

"Hey, there! Don't you see that sign?"

"Of course I do," answered the city man.

"Well," continued the warden, "don't you see it says 'No fishing'?"

"Yes, but it's away off. There's a bully fishing here. Just look at all I have caught."—Buffalo Commercial.

## MODERN FABLES

How Grandma Showed Up Pa to the Children.

BY GEORGE ADE. Copyright 1901, by Robert Howard Russell

Once there was a Man who Jawed his Children.

He thought that the Cherubim ought to sit up straight all Day and keep their Hands folded.

Pa had an impaired Circulation and Pur on his Tongue and a kind of Janers Complexion, and therefore Life was sad and serious. He came to him. He asked the Children to take the same View of the whole Demotion.

He was in a Blue Funk most time, and it was his earnest Deed that the whole Universe should Black Border in order to be in ag with his own mealy state of holy.

When he had nothing else to do, he p restraining Rules for the Kids, d them they must not waller in ass or climb Trees or get into When he commanded them to ut of Pilets, the Children Wessles, he to overlook the Fact that they the immediate Descendants of a astions Individual who always had or three Law Suits on hand and about with a Chip on his Shoulder.

He came down on them like 1,000 of Bricks if they failed to be Polite. He told them to be "Thank You," and always show Respect for their Elders, because that would be the only Chance that some of the Elders had to have any Respect shown to them.

He was a Stickler for Table Manners. He worried him if the Children did not use a graceful Grip on the Knife and Fork, and he insisted that they add "Please" whenever they shot in a Request for more Chow.

Furthermore, Pop leaned over from the Olympian Heights of his allround Superiority and talked down to the Offspring about Habits of Industry. It cut him to the Quick to learn that they had played Hookey and scooped up the Alley when Mamma wanted them to run Errands.

He said that in his younger Days he had been a great Help to his Folks and used to make his own Money and pay for his own Clothes.

To hear him tell it, he had been a Model Youth. He always wound up a Lecture by telling how he went to Sunday School and always had the Golden Text etched and captured the Prize for reciting off 200 verses of Scripture.

Sometimes, when the three Children realized what a Sweet Child their Male Parent had been, they felt ashamed and discouraged, because they knew they never could Buck Up and duplicate his juvenile Career. It was pretty hard to understand how and why such an Angel had grown up to be a grumpy Kicker, but they had Daddy's Word for it that he had been a real original Fauntleroy, and whatever he said went.

"When I was your Age," he would say to his trembling Flock, "I never wanted to eat between Meals, and I used to Buckle down to my Lessons every evening, until Mother would take my School Books and hide them to prevent me from ruining my Eye-Sight. I never was Cruel to Dumb Animals, neither was I rude to Little Girls."

This very remarkable Man had two Boys and one Girl who were permitted to live in the Shadow of his Greatness. The oldest Child was a Boy named Wallie. He was about 16 and running principally to Legs and Red Neckties. He was at the Aikward Age. His Voice was changing, and he had outgrown his Clothes, and he wobbled and stepped on himself when he walked. He

went about humped over as though he had been dried across a Barrel.

Wallie was passing through the Call Period. He was a little too old to Spank, and not quite old enough to heed the Voice of Reason. He put in a lot of Time combing his Hair. It seemed to him about time to drop out of School, because he certainly knew it all. He wrote Notes to Girls a few years older than himself, and furthermore he had got away with his first Cigarette.

Luckily Papa did not know. Papa was an end-to-end Smoker, and burned up about a dozen Black Cigars every Day, but it would have broken his Heart to learn that any Child of his used Tobacco.

The Old Gentleman was very tough on Wallie. He gave him the Gig at every opportunity, for he had no sympathy with Puppy Love and he hated a Dude, and he actually accused the boy of being Lazy. Papa had been such a Busy Bee all his Life, he had no Patience with a shikking Drone.

About the time that this Extraordinary Person had his three Children covered and subdued, his Mother came on a Visit. The Children gave a day Whoo when Grandma loomed up at the Front Gate. Their own Mamma usually played Second Fiddle to Papa, but Grandma took Orders from no one. While she was at the Home, the Children had one long Picnic. She staked them to Spending Money, and she stood between them and many a Scolding.

She had been a stern and Spartan Mother with her own Children, but the Grandchildren could have anything they wanted. They got on the Soft Side of the good Old Lady, and anybody who was mean to them stood an elegant Chance of hearing something Drop.

For several Days after she arrived, the Czar of the Household continued to publish Edicts and bark at Wallie, and Papa, and after the manner of all Americans who are swollen with Pride and Power, Grandma held in as long as she could, and then one day at the Dinner Table she veered around and gave him a Broadside that was a Beaut.

"Won't you ever get tired of badgering these kids?" she asked. "I've demanded, 'Instead of nagging them all day and telling them how Bad they are, you ought to get down on your knees and give Thanks that you've got three such lovely Children. The idea of you abusing your Wallie. When you were his Age, you read Yellow-Backed Novels and put Oil on your Hair, and wanted to jump into the Well because the School Teacher wouldn't clope with you. It makes me so datted Huff to hear you correct Rob and Ruth. You seem to forget that when you were little you always spilled Stuff over yourself at the Table and wasn't worth your Salt at doing Chores, and had a Temper like a Crosscut Saw. I raised six Children, and you gave me more trouble than all the others put together. You were so Dumb at School you had to drop back two Classes. All you wanted to do was to tear out with those Tongs and kill Birds with Nigger-Shooters. I'm glad your Children take after their Mother instead of you."

There he sat, Blown Up and the Search Light turned on him. He was caught with the Goods.

After that he didn't dare to Peen. The Children were ready to pull his Great on him. So it was a Happy Home.

Moral—Keep the Children in the Dark.

## INFORMATION FOR FARMERS

(Communications to be addressed to "Agricultural," Colonist.)

## FOR B. C. FRUIT.

It is for fruit in Manitoba and St. Francois are in a very condition. The magnificent crops all through the country are ripening, and given fine harvest, the grain will soon be ready a way to market. This will make money plentiful, and an increased demand for fruit will follow as a matter of course. In fact, there is hardly a 25 to the demand, except the pocket, the consumer. At the present time, it is scarce and high in price; plums at Bartlett pears from California and other melons from Georgia are the plums. There is a strong demand for cherries for preserving, and the supply is almost nil. This shortage will be made up when the preserving season for plums and peaches arrives with these fruits.

In Winnipeg the wholesale fruit trade is managed by a fruit exchange, the members of which are the wholesale fruit importers. Uniform prices are made to the retail trade, and the supply is regulated so that there is no glut of fruit at any time. Short credit only is given on accounts, and the exchange is particularly very satisfactory except, perhaps, to those who are looking for bargains in cheap fruit.

British Columbia fruit will meet with active competition in the markets referred to, with fruit from Oregon, Washington and Ontario. It is most important that great care should be exercised in packing and grading, to compete on favorable terms. In plums particularly it is necessary that the fruit should be uniform in size and degree of ripeness, and should be packed when partially ripened, so that it will remain in marketable condition several days after reaching destination. Packages should be well filled and packed so that the fruit will not bruise in transit, from moving in the package. Crates of plums from California or Oregon usually contain 22 lbs. net weight of fruit.

As a rule, California fruit is preferred by retail dealers, on account of its good keeping qualities, but it is freely admitted that British Columbia fruit in good condition is much superior in quality and flavor. Dealers complain that many of the plums shipped from the Fraser Valley in recent years arrived in poor condition, soft and over-ripe, hence loss to the shipper and disappointment to all concerned. On the other hand, fruit shipped from the Okanagan Valley has given good satisfaction, and there will be plenty of competition amongst growers of fruit from this section of the province.

Freight rates are in favor of the British Columbia grower as against shippers from the United States. The rate on fruit from California points to Winnipeg is \$1.40 per 100 lbs., with an extra charge for 10 cents per package for insurance and peaches, and 20 cents for apples. From Oregon fruit is \$1.25 per 100 lbs., with an extra charge for 10 cents per package for insurance and peaches, and 20 cents for apples. From Washington fruit is \$1.25 per 100 lbs., with an extra charge for 10 cents per package for insurance and peaches, and 20 cents for apples.

lots from Hood River, in Oregon, to the amount of four cars; these wholesaled at \$4.15 to \$4.25 per crate of 24 lbs. The duty on these shipments alone amounted to \$1,000, and freight to more than \$1,400. It is estimated that at least 50 carloads of pears, peaches and plums will be required during the present season, either for consumption in the city or for distribution to points along the railways radiating from Winnipeg.

To assist British Columbia growers in obtaining a share of this business, the Canadian Pacific Railway Company have agreed to furnish free transportation to the export fruit packer from California who has been engaged by the British Columbia Fruit Growers' Association to give practical lessons in packing, grading and loading of fruit in the different fruit-growing districts, and also free transportation for a man to go with an experimental carload of fruit which is to be shipped under the auspices of the same association. Special attention will also be given to the icing of carload lots of fruit, and the time en route reduced to the lowest limit possible.

The market for fruit in the Northwest is growing much faster in proportion than the production of fruit in British Columbia, in fact, to keep up with the development of the prairie provinces, it will be necessary to plant new orchards by the hundreds of acres, and by the time these are in bearing, the disparity will probably be more marked than now, so far as may be foreseen.

## SKIM MILK FOR BEEF CALVES.

The Nebraska Experiment Station has been conducting some experiments to show the profit of raising beef calves on separator milk as compared with that derived from allowing them to suck their dams.

To start this experiment, western grade Hereford and Shorthorn cows were selected, the aim being to secure individuals uniform in respect to date of calving, type and milk tendency.

The cows were divided into two lots, Lot I, being taken from their calves, while Lot II, were allowed to run with them.

The animals in both lots were weighed once a week, and all rations carefully measured and recorded.

The calves fed by hand made good gains during the first five months, but not equal to the lot running with the cows.

When the two lots were put on feed after the test, there was not much difference in the condition or form, but the sucking calves were smoother and better fleshed.

After weaning, the half-fed calves had the advantage, being accustomed to rations of dry forage and grain. At the end of the year there was practically no difference, either in appearance or weight, between the two lots. To find the difference in the cost of raising the two lots, all feed was charged to both cows and calves at market price.

In this test it was found that a skim-milk calf cost less than a whole-milk calf.

production, but still they averaged 3,992 pounds of milk and 168 pounds of butter fat during the milking period. This amount of butter fat would make 184 pounds of butter, which would be the amount charged to each sucking calf.

As to the quality of the two lots, at the age of 14 months it was quite impossible to detect any difference between the sucking and skim-milk calves.

## SEEKERS FOR FAME.

Two Eccentrics Will Challenge Fate at Niagara.

Capt. W. Johnston, of New York, has arrived at Niagara Falls, Ont., and announces that he proposes to navigate the whirlpool rapids and whirlpool in a boat of fire. The boat will be sixty feet long, thirty feet beam, and will draw three or four feet of water. It will be schooner rigged and in place of sails will have a network of asbestos, which will be converted into a seething mass of flame.

Three trips will be made as far as the cantilever bridge, and the fourth and last one will be continued through the rapids and whirlpool.

George H. Farrell, a well-dressed young athlete, is also in the city on a peculiar mission. Having become tired of executing high dives and perilous bicycle feats under a canvas, he has decided to gain fame and fortune by riding across the Niagara rapids on a grooved cycle fitted to a wire cable. In Toronto all financial arrangements are to be made for the accomplishment of the hazardous undertaking. It will take \$300 to stretch a cable across the gorge, and another hundred for the freak wheel. If Farrell should make the trip successfully, the sawdust ring will see him no more, and if he should fail, well, the circus will not be the only thing that will miss his company. The nervous young man is only reckoning with success however. Failure does not enter into his calculations.

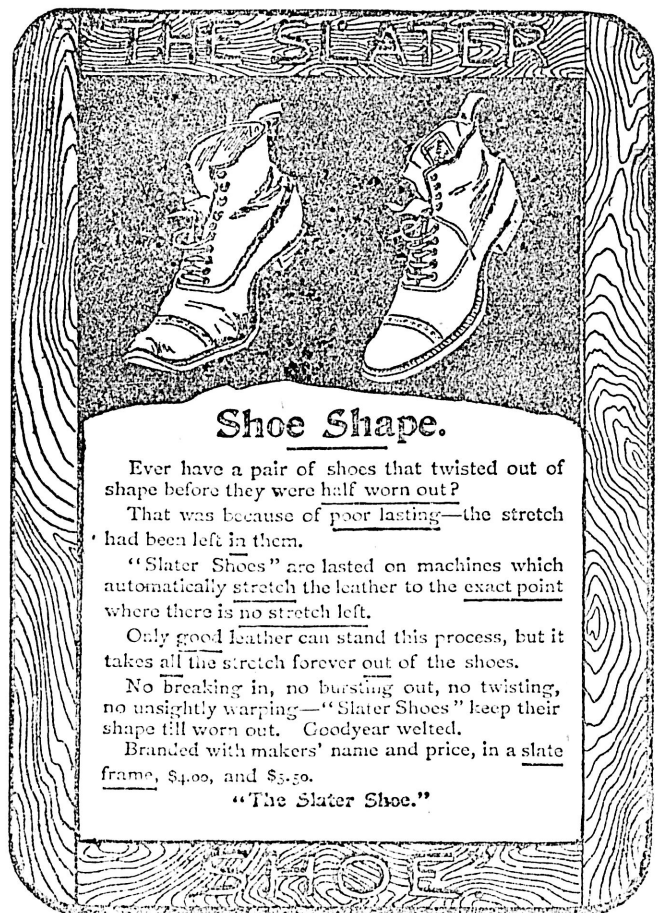

## You Are Not Sick But Feel Miserable.

Nearly everybody seems to complain more or less at this season of the year. You feel the need of some tonic to put new strength and energy into the system. You don't sleep well, and suffer more or less from headache and dyspepsia. It may be you are depressed and discouraged, and feel the affairs of every-day life a burden. Little things worry and irritate you. You are not sick, but lack the vitality that is necessary for health and happiness.

There is one preparation which is doing wonders these days as a restorative and nerve invigorator, and that is Dr. Chase's Nerve Food. It is different from any medicine you ever used, for instead of tearing down the tissues of the body it builds them up, and so thoroughly fills the system with new life and vigor as to overcome pains and aches, weaknesses and irregularities. It is surprising what a host of people are using this great food cure. A few weeks' trial will convince you of its singular merit.

## Dr. Chase's Nerve Food

50 cents a box. Six boxes for \$2.50. All dealers, or post paid from Edmansons, Bates & Co. Agents wanted for Dr. Chase's Last and Complete Receipt Book.

## Shoe Shape.

Ever have a pair of shoes that twisted out of shape before they were half worn out?

That was because of poor lasting—the stretch had been left in them.

"Slater Shoes" are lasted on machines which automatically stretch the leather to the exact point where there is no stretch left.

Only good leather can stand this process, but it takes all the stretch forever out of the shoes.

No breaking in, no bursting out, no twisting, no unsightly warping—"Slater Shoes" keep their shape till worn out. Goodyear welted.

Branded with makers' name and price, in a slate frame, \$4.00, and \$5.00.

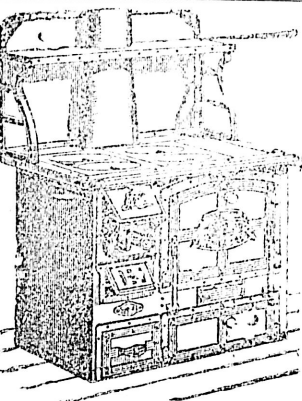

"The Slater Shoe."

NOTICE TO CONTRACTORS.

Reconstruction and Repairs, North Arm Fraser River Bridges, at Eburne, B. C.

Sealed tenders, properly indorsed, will be received by the undersigned up to noon of Saturday, August 31st instant, for the reconstruction of the Mile Bent Approaches to, and for the renewal of the floor system of the Through Spans of, the North Arm Fraser River Bridges at Eburne B. C.

Drawings, specifications, and forms of tender and contract may be seen at the Lands and Works Department, Victoria, B. C., at the office of the Government Timber Inspector, Vancouver, B. C., and at the Government office at New Westminster, B. C., on and after Saturday, the 17th day of August.

Each tender must be accompanied by an accepted bank cheque or certificate of deposit, made payable to the undersigned, for a sum equal to ten (10 per cent) per cent. of the tender, which will be forfeited if the party tendering decline to enter into contract when called upon to do so, or if he fail to do the work contracted for. Cheques of unsuccessful tenders will be returned upon signing of contract.

The Department is not bound to accept the lowest or any tender.

W. S. GORE,

Deputy Commissioner of Lands and Works, Lands and Works Department, Victoria, B. C., 12th August, 1901.

RESERVE.

Notice is hereby given that all the unappropriated Crown lands situated within the boundaries of the following areas are hereby reserved from pre-emption, sale, or other disposition, excepting under the provisions of the mining laws of the province, for two years from the date hereof, pursuant to the provisions of sub-section (5) of section 41 of the "Land Act," as amended by section 6 of the "Land Act Amendment Act, 1901" to enable the Cassiar Power and Industrial Company, Limited, to select therefrom timber limits for wood pulp and paper manufacturing purposes, as provided by an agreement bearing date the 30th day of July, 1901, viz:

Areas numbered from 1 to 40, inclusive, upon a chart filed in the Lands and Works Office (numbered 4290-01, and thereon colored red, which areas are situated on the east and west shores of Observatory Inlet, on both shores of Hastings and Alice Arms, on the east shore of Portland Canal and Portland Inlet, on both sides of Hutzy-maten Inlet, on the Nias Bay and River, and on islands in said waters, containing in the aggregate about 125 square miles.
